Report of the Superintendent of Schools

To the School Board and Citizens of Hebron:

I herewith submit my first annual report of the schools of this town for the municipal school year ending Feb. 1, 1923.

Of our teachers two are practically normal graduates with long and successful teaching experience, another has taught with complete success for several years, and the other three are high school graduates who are doing their first work in the school room as instructors.

I am glad to be able to report on the whole a very successful school year. The teachers have worked faithfully and the pupils in general have responded well to their efforts. In skill of instruction and school room management three of our teachers have shown a type of ability that would be hard to equal in any community. Their work is a convincing evidence of the wisdom of employing trained teachers for our schools. The work of the other three teachers has been surprisingly good when such factors as age, inexperience, and lack of normal training are taken into consideration. They have shown a fine spirit in their work and with experience and the proper training they will make first class teachers.

You have a very good class of school children in town. They are teachable. They react well under the stimulus of effective teaching and they show a desire to accomplish results. With such pupils and with good teachers progress is possible and we find that in the great majority of our schools progress has been made this year.

It is my purpose in the latter part of the spring term to give a series of standardization tests in Reading and Arithmetic in order to compare the work of the pupils with standards obtained from other schools. The results of these tests will be open to inspection of pupils, teachers and parents.

Four of your school buildings ought to meet the requirements of the new school law in regard to arrangement of toilets without change. In two of your school buildings, the one at No. 8, and the one at the village, radical changes will have to be made. In general I consider your school buildings to be in good condition if a comparison with those of other towns is any standard to go by. It is true that they were constructed before the subject of cross-lighting came up for discussion among school men. But the window arrangement can be easily changed. They are kept in good repair and clean.

There is a movement on foot at the village for the construction of a new school building at that place. It is certain that something must be done to relieve the congestion in the present building. Here is a building about 27 ft. by 20 ft. with about one-third of what should have been floor space taken up by two entries and a teacher's platform leaving a space 19 ft. by 20 ft. to be occupied by 27 pupils crowded together with three in a seat in some instances. There are two ways to remedy this; enlarge the present building or, what is better, build a new one. There is now and has been for some time past talk of consolidating four districts and building a two-room building that will accommodate all the pupils of these four districts. If you do this you will be following along the line of modern ideas in rural school administration. This plan seems to offer our greatest hope for improving rural school conditions. In the West where education keeps pace with industrial progress this plan is being carried out with great success. In parts of Aroostook County it has been tried and the stamp of approval has been placed upon it. If this be done then two schools with four grades each can be arranged in place of the present system of one teacher teaching eight grades. The advantages of such a system is obvious to any one with experience in school affairs. Personally I feel that this is your problem and I hope it can be solved with the greatest good to the greatest number, or in other words, to the general satisfaction of all.

The following statistics are taken from the registers and the monthly reports of the teachers.

Registration, spring term, 1922.....	79
Average attendance, spring term, 1922.....	67.74
Percentage attendance, spring term, 1922...	86
Registration, fall term, 1922.....	83
Average attendance, fall term, 1922.....	73.693
Percentage attendance, fall term, 1922.....	89

Grouping these statistics by schools we obtain the following for the fall term, 1922:

School	Registration	Av. Attendance	Percentage Att.
Academy	27	24.8	92
Alders	10	9.4	94
No. 8.....	10	8.483	85
Sodom	13	10.71	82
Brighton Hill.....	14	13.	93
Nelson	9	7.3	81

It will be seen from the above table that the attendance in three of the schools is good; in the other three it is too low. Various reasons were given for non-attendance such as sickness, kept at home to work, and other contributing causes more or less valid. After giving due consideration to the different excuses the evidence seems clear that 30 per cent of the cases of non-attendance were pure truancy while 70 per cent. of the cases were in some measure justifiable.

The financial statement which follows covers a school period of 29 weeks. For this period this statement may be considered as practically complete. One small janitor bill has not come in at the date of writing, but this is the only bill that has not been in for payment. If any unpaid bills for the school year 1921-'22 have been paid during the current school year, then this statement will give the school expenses of the present municipal school year plus any unpaid bills of last year that may have been paid after the town books for that year were closed. If any such bills are found they will be indicated as such. To recapitulate: this statement will include every school voucher issued from this office from the time the town books were closed in 1922 till the books were closed in 1923.
